LETTER OF APPRECIATION

We are proud to present this letter of appreciation to

Lampson International LLC

Mr. Bill Lampson

On behalf of ConocoPhillips Alaska, Inc. we would like to recognize Lampson International LLC for your outstanding performance in support of our 2011 Beluga Wellhead Compressor Project in Alaska.

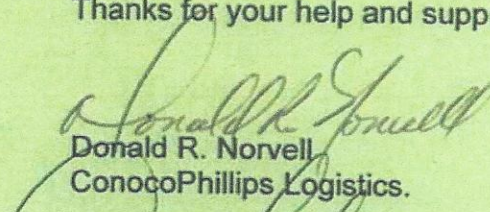

Your experience, professionalism and attention to detail, was a valuable contribution to the overall success of this project. It is obvious that the decision to utilize your company and port facilities in Pasco, Washington for this project was the right one for ConocoPhillips Alaska, Inc.

The safety culture exhibited by your company and on site personnel during this project is note worthy and appreciated by all of us who witnessed the safe loading and offloading operations both in Pasco, Washington and here at our landing and staging site in Alaska.

A special thanks to Rusty Rutherford not only for his planning abilities, guidance, suggestions and recommendations that contributed to our overall success. But also for his patience in accommodating an ever changing load out schedule and added scope of work requests.

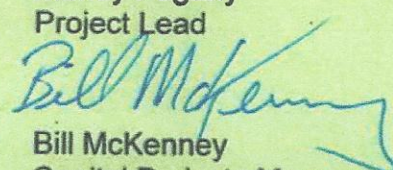

When the need arises, we would welcome the opportunity to work with Lampson International LLC and your group of professionals.

Thanks for your help and support,

Donald R. Norvell
ConocoPhillips Logistics.

Don Schreiner
Cook Inlet Portfolio Manager

Mandy Pogany
Project Lead

Bill McKenney
Capital Projects Manager
