Mr. Bucky Gros
Lampson International LLC
4305 E. 60th Ave
Commerce City, Co
80022

Dear Bucky,

With the successful completion of the Gasoline Benzene Reduction (GBR) Project at the Commerce City Refinery, I would like to take the time to thank you and your team for the world class services Lampson provided our Project team.

Back in May 2011, your teams coordinated efforts with the GBR General Contractor and transporter company were critical to achieving the successful lifts of three components in the GBR ISBL plot. Lampson's onsite team worked safely and effectively to transport the three components to their lift points without a hitch.

In December 2011, once again Lampson played a critical role to the success of the GBR Project. The commitment to Suncor was clearly evident with Lampson's procurement of a new crane to lift the 250' free standing flare. This level of customer service was widely recognized and appreciated by Suncor.

The thing that all members of the GBR team can say with pride and confidence is that our safety record on the project was best in class and speaks for itself. A large contributor to the safety success of the Project was the role Lampson played.

Lampson employees were qualified, professional and prepared for the tasks at hand. They communicated effectively with all parties onsite and their dedication to a safe working environment was evident each time they were onsite.

In closing, I want to thank Lampson International and especially you Bucky, for your leadership, professionalism and dedicated support to ensure the Suncor GBR Project was a success.

I look forward to having the opportunity to work with you and your team in the future.

Thanks,

A handwritten signature in blue ink that reads "Peter Dunphy".
