Bryan Pepin-Donat
Lampson International LLC
Kennewick , Washington

This letter is written on behalf of Suncor Energy Inc in Fort Mc Murray, Canada. In general it is a special thank you and a letter of reference for Lampson International out of Kennewick, Washington. I have personally been working with Lampson since March of 2004 as the Project Manager and Operations Manager for the development and operation of a prototype technology at Suncor.

I will highlight a few items and welcome further discussions on the highlighted notes.

From the onset of the project, when Suncor brought Lampson onboard, it was to use their Engineering excellence to aid with the development, design and implementation of mobility options for the project components. From the start it was clear that Lampson's engineering excellence and creative approach would result in innovative methods and equipment relative to the transport of 1425t material handling facilities.

Over the period from 2004 to the present Lampson has consistently shown depth in the area of project planning, problem solving and has been able to support the Project Plan at a very high level. During the operations phase of the project Lampson has continually supported the project with high quality operators, engineers and senior leaders. Much of the project success can be attributed to the safe, professional and efficient personnel and methods that Lampson provided during the 3.5 year operational period.

Starting with initial negotiations and continuing through project planning, project implementation and project operations Lampson and Suncor developed a mutual respect and a firm relationship. This mutual respect fostered high efficiency in the day to day activities. Lampson has always been available to refresh some engineering lifts and sit and discuss lessons learned to establish Team clarity for the next phase. This short notice response and their continued support was always highly appreciated and has placed Lampson as a leader in the industry in the eyes of Suncor.

In conclusion I would welcome any further discussions help clarify the statements above and would highly recommend Lampson International LLC as a company to be associated with

Sincerely,

A handwritten signature in black ink that reads "Paul MacDougall". The signature is written in a cursive style with a large, prominent initial "P".
