## LTL-350/500 Transi-Lift® Mobile Heavy Lift Crane

## LTL-350/500 Transi-Lift ® Mobile Heavy Lift Crane

**Basic Specifications** 

Multiple Boom Options Available

Ultimate Capacity up to 390 US Tons

Easily Transportable by Conventional Trucks

Crawler Can Be Used Independently if Needed

Fast Assembly and Disassembly

Adjustable Stinger Length for Confined Areas

Call For Complete Capabilities

The Lampson LTL-350 and 500 Transi-Lift<sup>®</sup> Mobile Cranes are two models of the World's most versatile Heavy Lift System. These models combine the heavy lift capabilities of Ringer<sup>®</sup> equipped cranes with the mobility of conventional crawler mounted equipment.

Utilizing the patented Transi-Lift<sup>®</sup> concept, Lampson has teamed a conventional Lift Crane with a Crawler Transporter to dramatically increase the lift capacity while still maintaining excellent mobility.

As an added benefit these models of Transi-Lifts® can be quickly reconfigured back to conventional Lift Cranes when the additional heavy lift capacities are no longer required. The Lampson Transi-Lift® Model LTL-350 and 500 are available now to bring your project to completion on schedule and within budget.
